

### Cambio FireXPosition y FireYPosition

He creado formatos para los input Text

```
JFormattedTextField(formatter);
```

```
NumberFormat format = NumberFormat.getIntegerInstance();  
NumberFormatter formatter = new NumberFormatter(format);  
formatter.setValueClass(Integer.class);  
formatter.setMinimum(0);
```

```
NumberFormat formata = NumberFormat.getIntegerInstance();  
NumberFormatter formattera = new NumberFormatter(formata);  
formattera.setValueClass(Integer.class);|
```
